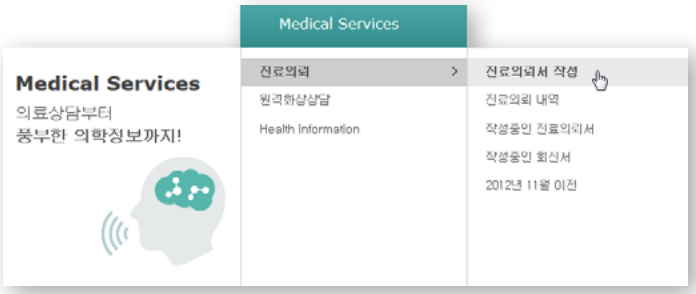
A. Outline

B. Before Starting

inPHR.com is a health portal site that provides a customized health program for easy and prompt management of general health-related items such as blood pressure, glucose along with hospital treatment records. In addition, it functions for medical examination tourism including the domestic inducement of foreign patients through the referral system.
At inPHR.com, you can do own health checks and get helps by establishing a relation with registered doctor members by designating them as your private doctors. The company is providing high-quality services from which you can get health consultations, surgery consultations before visiting the hospital, and post-treatment management through remote video consultations with specialists without visiting the hospital.

✓ **Remote video consultations:**
Remote video consultations with medical staff or coordinators are possible.

✓ **Referral:**
inPHR.com connects you to reliable specialists at medical institutions of Korea.



✓ **Health management:**
Individually-customized health management is possible.

✓ **Hospital treatment records:**
Can view the history of medical treatments and drug prescriptions from the hospital where you were treated

C. System specifications for a remote video consultation

Before using functions of remote video consultations at inPHR.com, please check the following hardware and network specifications. If specifications are not compatible, the program cannot be installed or an error could occur.
(For the firewall check-up, make sure to open 7084 and 7085 ports.)

Hardware

CPU	Minimum Pentium IV 1.0 GHz
RAM	Minimum 512MB
HDD	Minimum 20GB
PC Camera	USB 1.0/2.0 Camera or CCD Type Camera (Capture card included)
Sound	Full Duplex
Headset	Headset or Speakerphone
OS	Microsoft Windows 7 / XP / 2000 / Vista

Network

Speed	xDSL
Firewall	TCP/UDP Service Port Open 7084, 7085

inPHR.com provides a lifetime health management of an individual.
Remote video consultation, writing a referral form, health managements for individuals and family, and comprehensive hospital services are all possible at the site. All services are available after member registration.
Registration method is as follows.

❸ **Patient information** _ Search for registered patients. If you have a doctor or agency authorization, it could be selected from the list of patients under your management.

❹ **Patient medical information** _ Fill out the main diagnosis, specific questions, expected visit date, history of surgery or treatment, current medications, and then upload the related data if corresponding treatment data are available.

❺ By clicking send after checking 'Agree' for data provision, your referral is sent to corresponding agencies.

❻ By clicking Save Temporarily, your referral form is not sent, and you may complete it later.

** When the referral is sent, it is sent to the coordinator of the requested medical institution by e-mail and text messages.

B. What is the Referral Report?

This menu is filled out or modified only by the coordinator or doctor member at the requested medical institution. View of the referral report written by the requested medical institution is possible for the referred Doctor, coordinator, and agency.

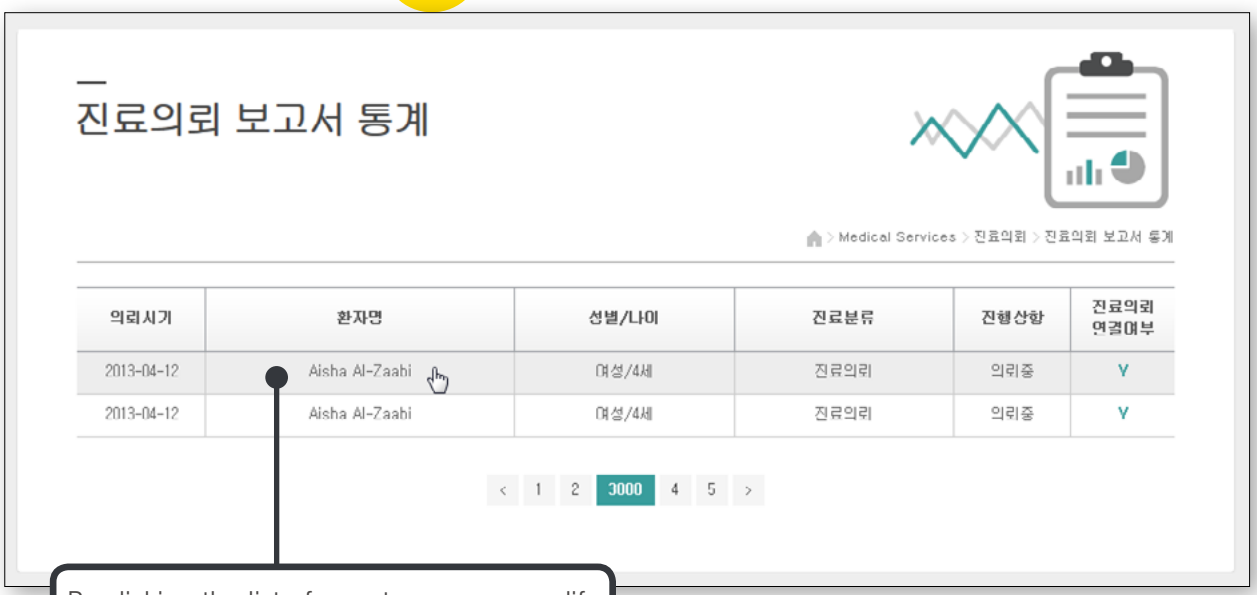
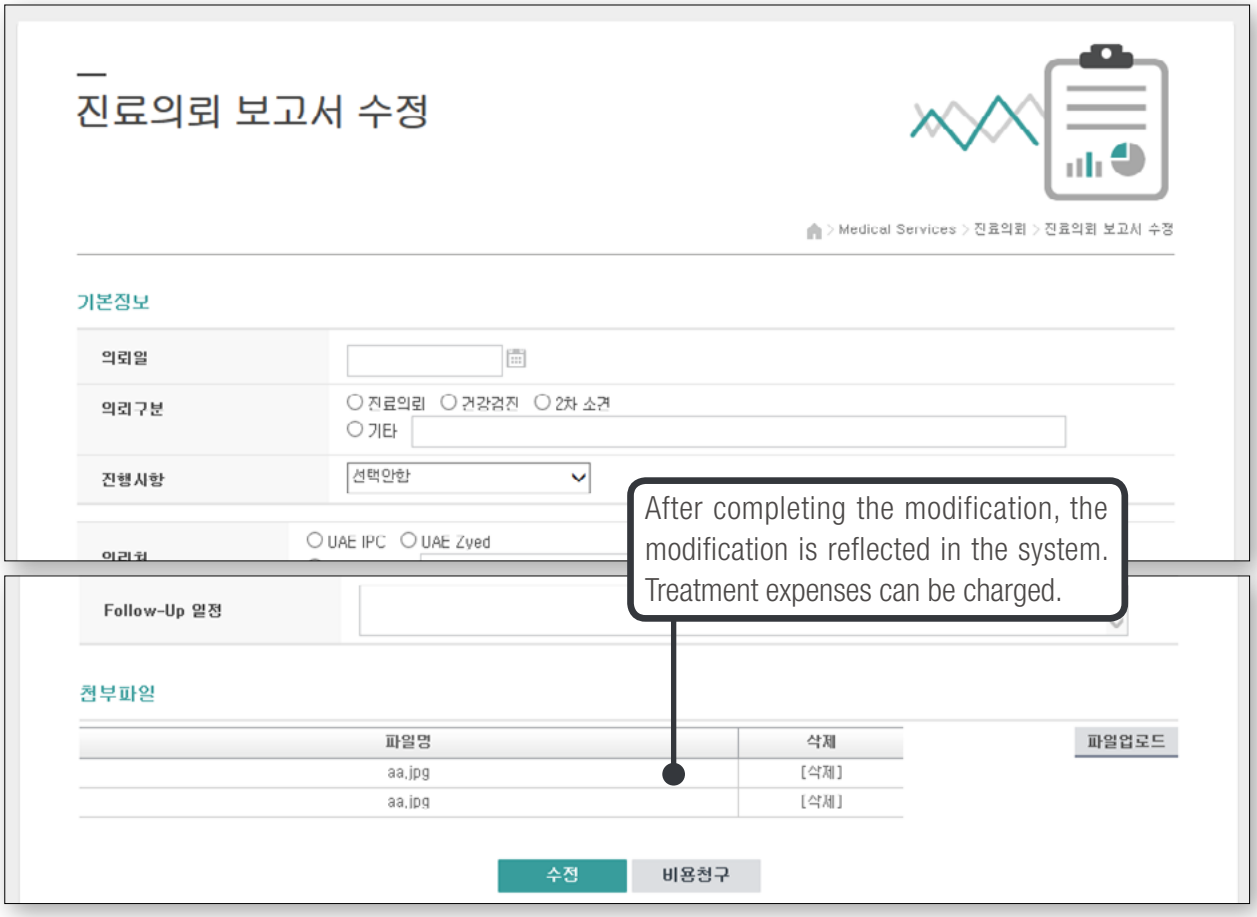
It is consisted of basic information, patient information, reply information, detailed information, attached files, and provides detailed information on entry-departure date, hospitalized and discharged date, expenses, etc.

▶ Referral report- Doctor

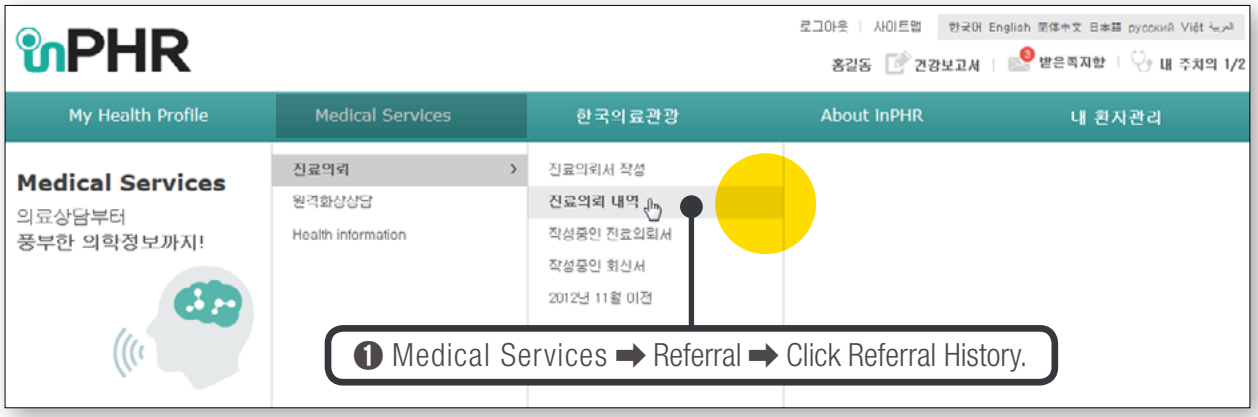


By clicking the list of reports, you can modify the contents of the corresponding report.

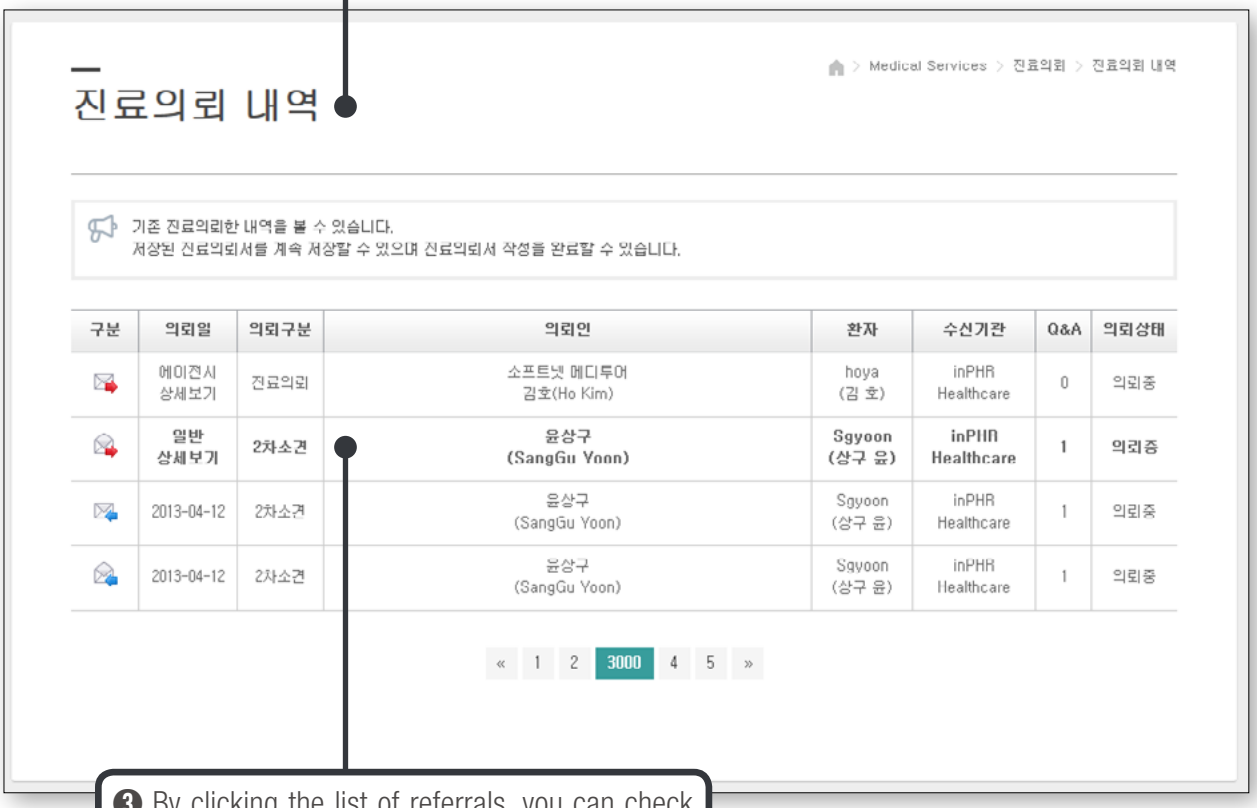


After completing the modification, the modification is reflected in the system. Treatment expenses can be charged.

C. Referral history check

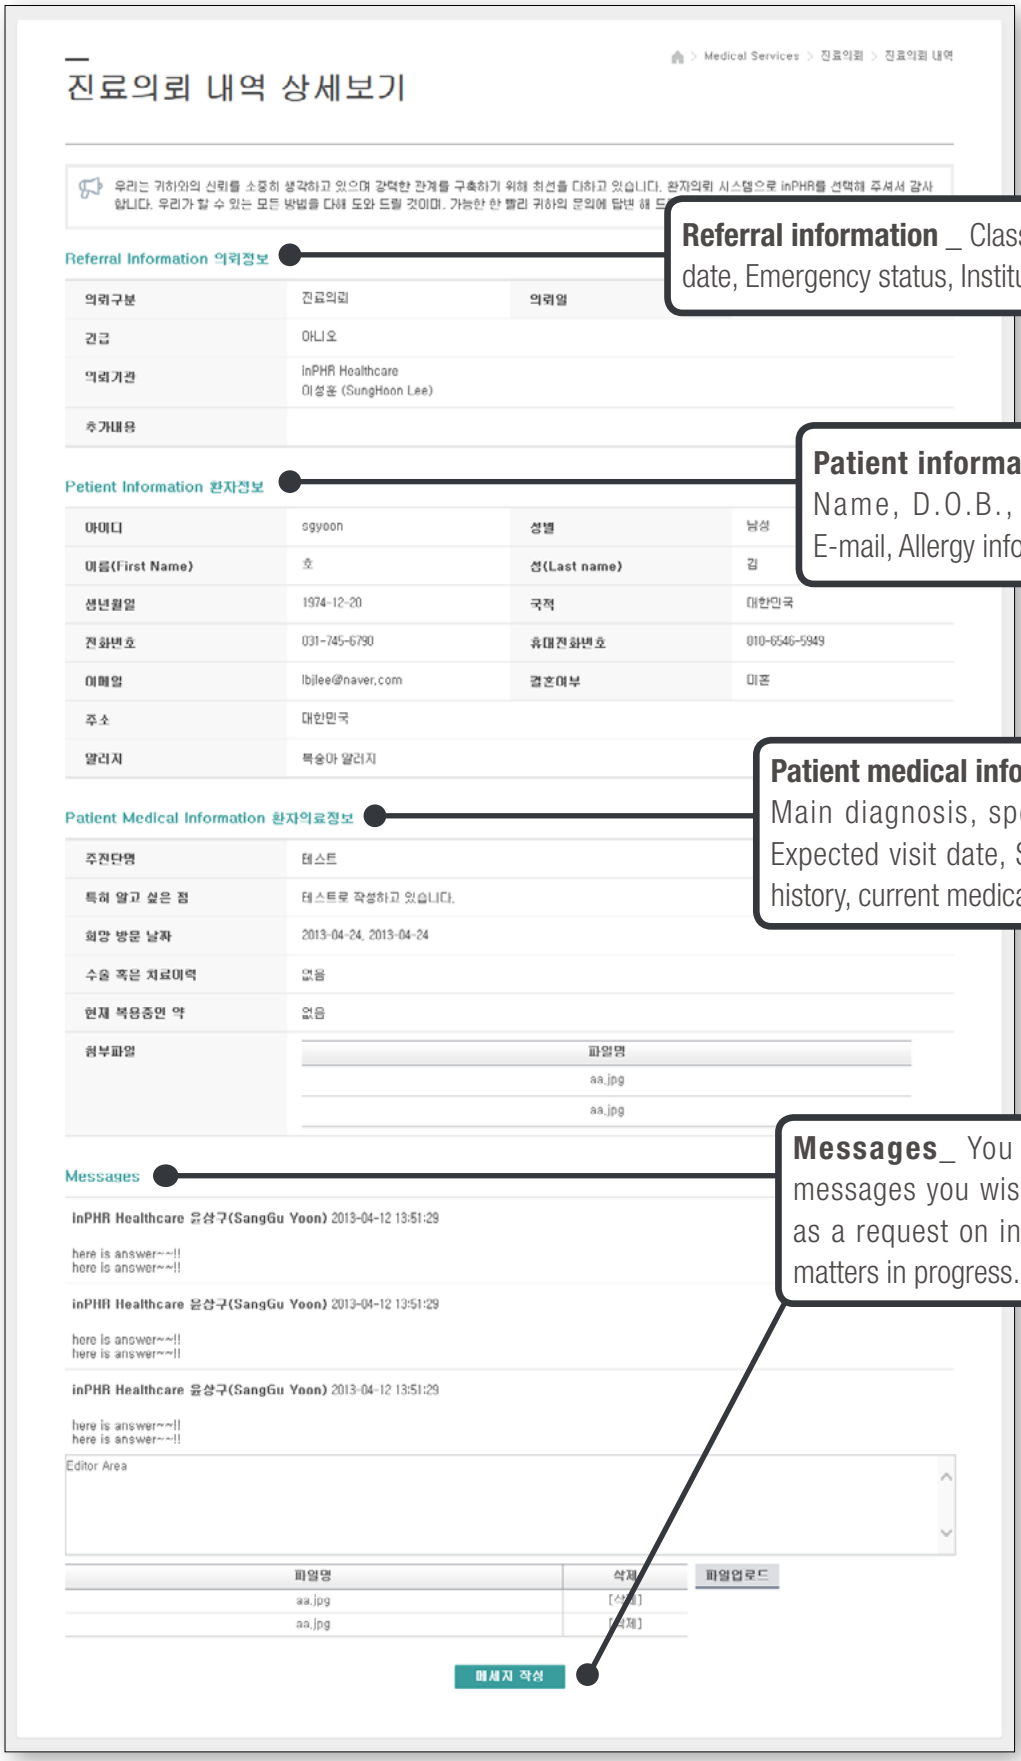


❷ You can view the referral history up to the present.



❸ By clicking the list of referrals, you can check detailed information on the related referral.

Referral System



Referral information _ Classification, Referral date, Emergency status, Institution, etc.

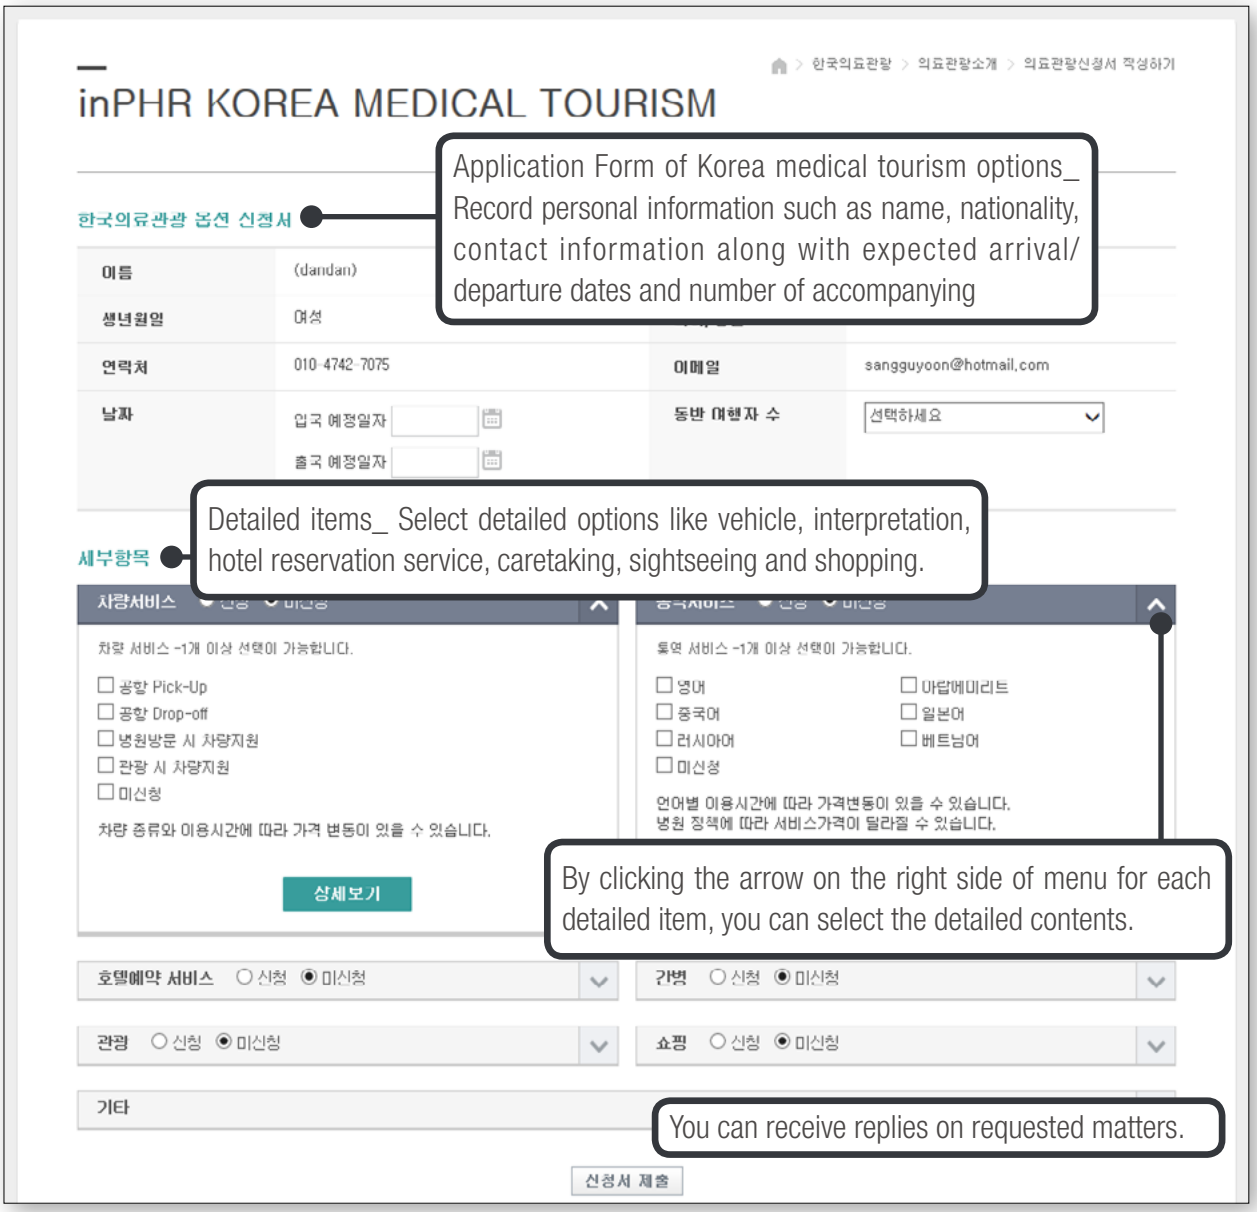
Patient information_ ID, Gender, Name, D.O.B., Phone number, E-mail, Allergy information, etc.

Patient medical information_ Main diagnosis, specific questions, Expected visit date, Surgery/treatment history, current medications, etc.

Messages_ You can leave other messages you wish to deliver, such as a request on insufficient data or matters in progress.

D. Application

❶ Korea medical tourism ➡ Introduction on Medical tourism ➡ Click Write the Application Form for Medical Tourism



Application Form of Korea medical tourism options_ Record personal information such as name, nationality, contact information along with expected arrival/ departure dates and number of accompanying

Detailed items_ Select detailed options like vehicle, interpretation, hotel reservation service, caretaking, sightseeing and shopping.

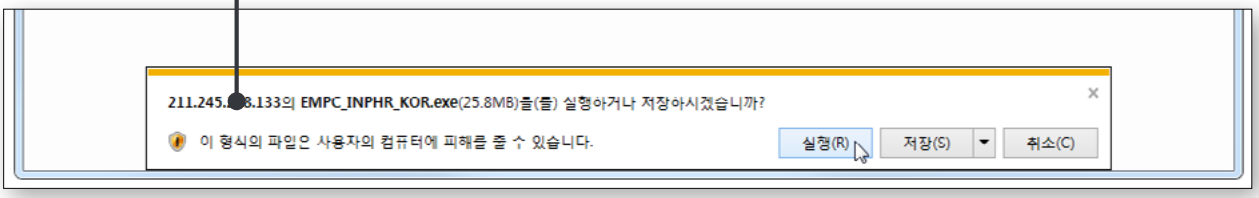
By clicking the arrow on the right side of menu for each detailed item, you can select the detailed contents.

You can receive replies on requested matters.

A. Installation of the remote video consultation program

In order to use remote video consultations, the program must be installed.

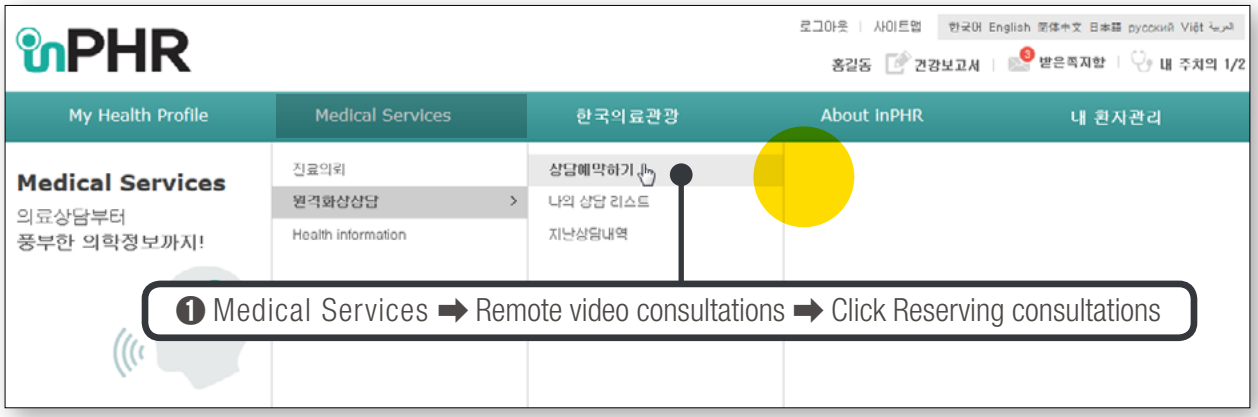
❸ When trying to start video consultations without installation of video consultation program, the program download window automatically pops up on the web browser.

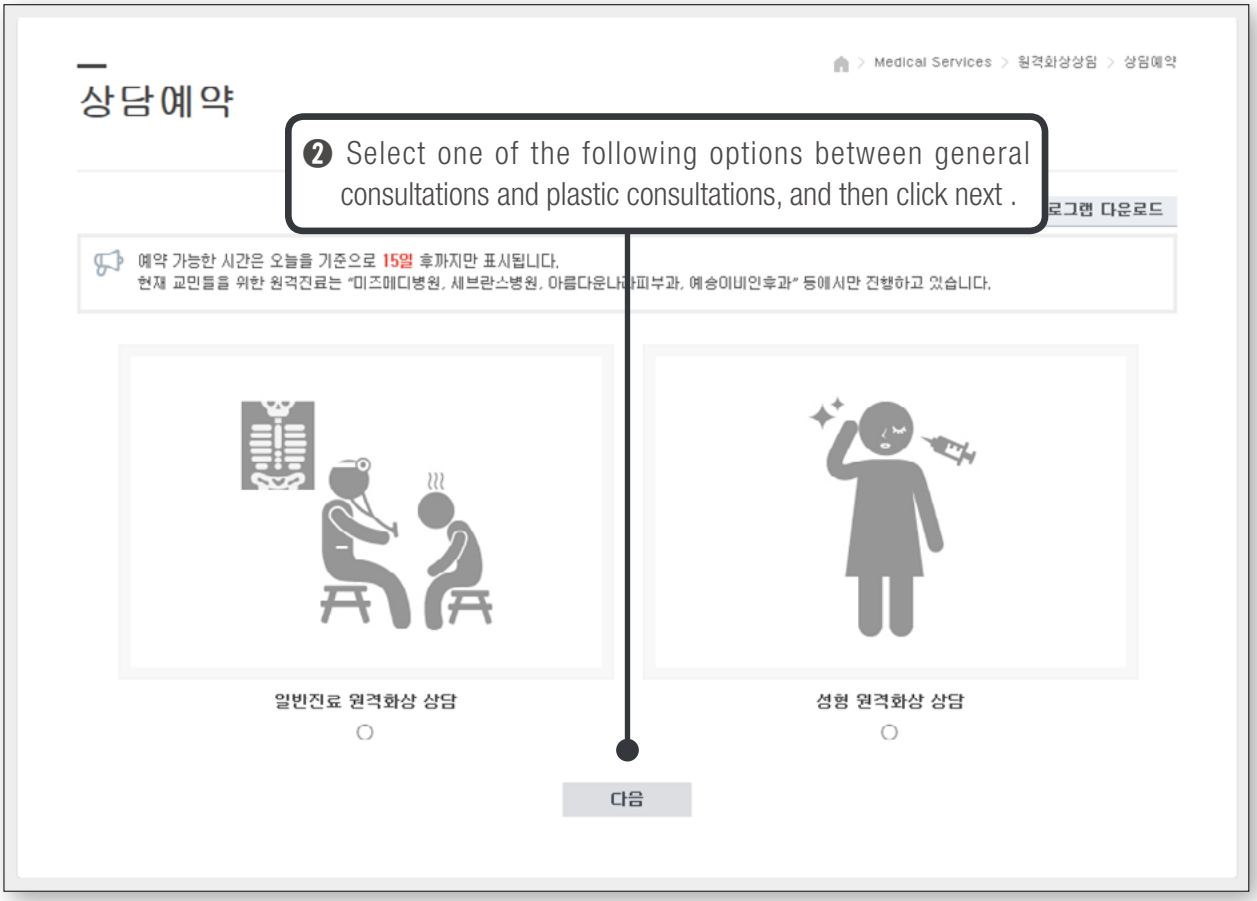


Install the program before conducting your video consultations.

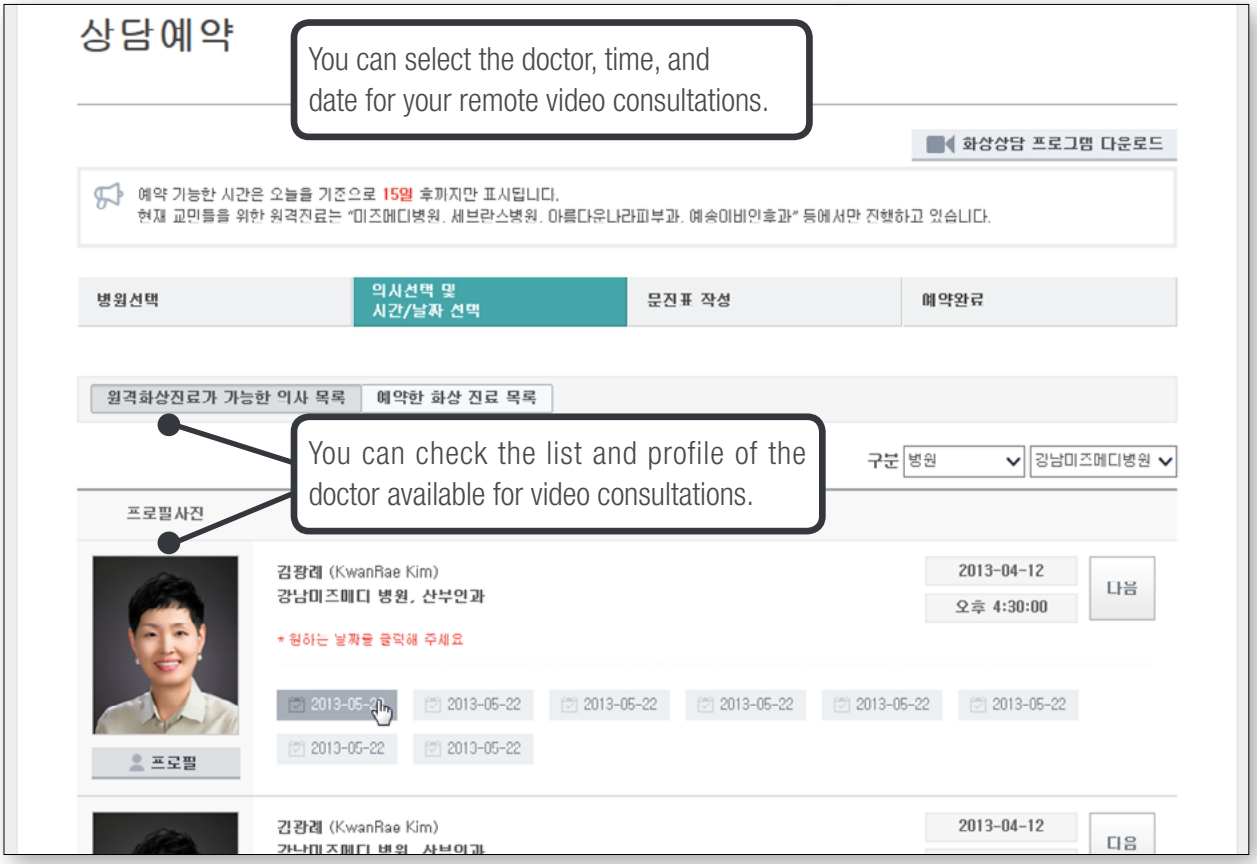
Remote video consultation program is compatible only under Windows OS.
(Cannot be used under OS such as Mac OS, Linux.)

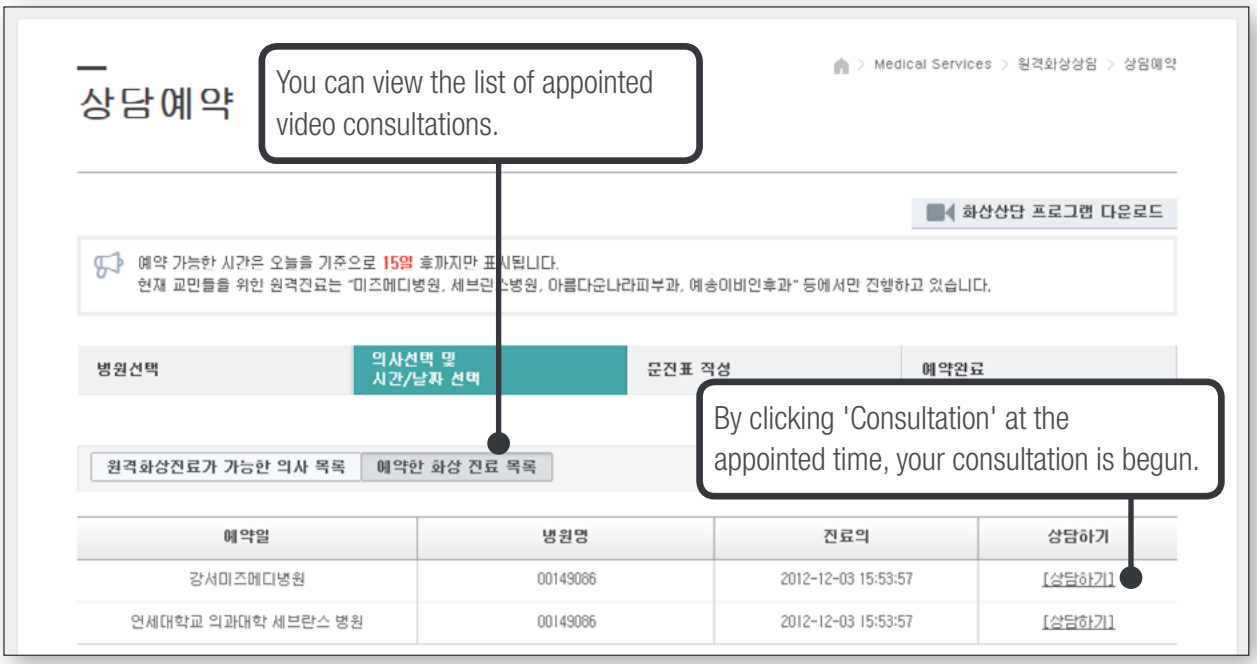
B. Reserving Consultations



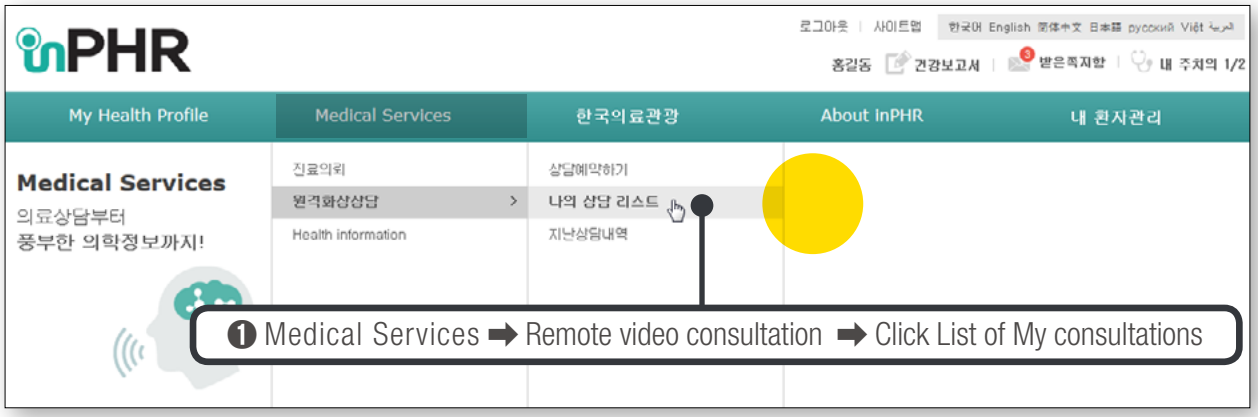


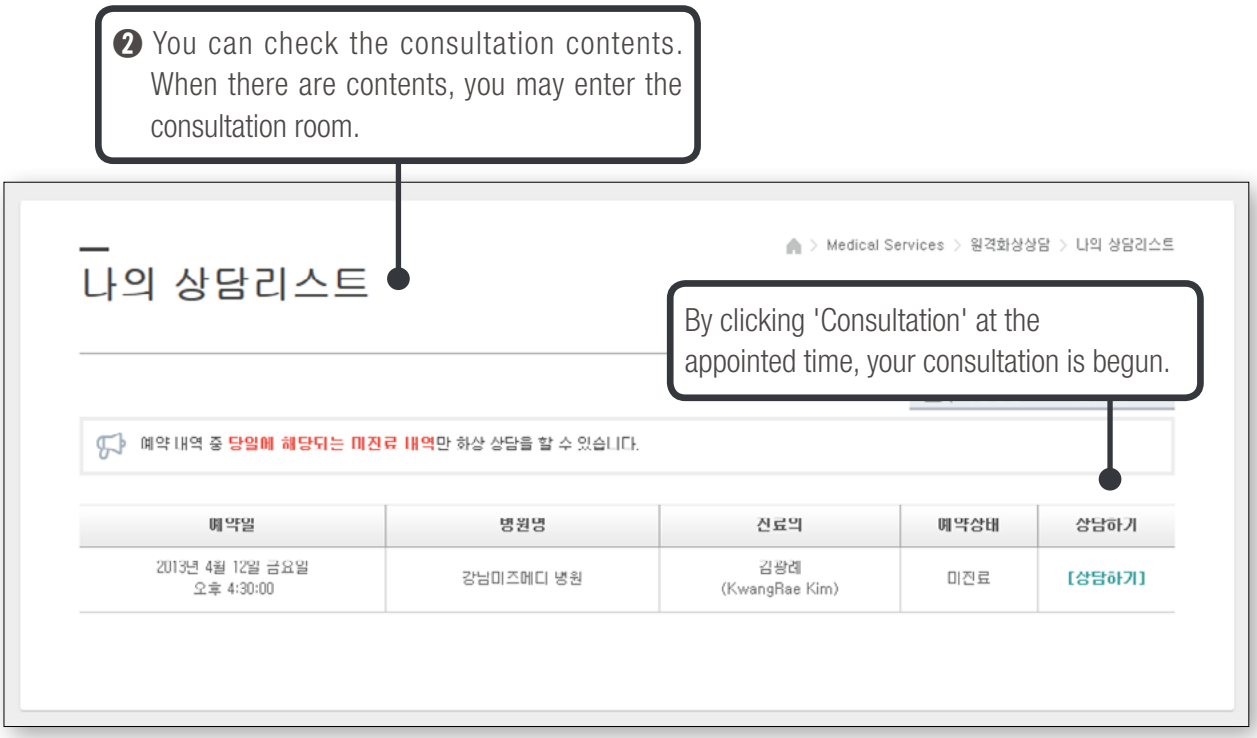
For general hospitals, you can get remote video consultations from the doctor member available for the consultations. For this purpose, you must go through the appointment process, and may briefly describe your own conditions upon making a appointment. After making the appointment, you have to enter the consulting room on time for appointment, which is allowed from 30 minutes prior to the appointed time.





C. Entering the





❷ You can check the consultation contents. When there are contents, you may enter the consultation room.

D. Functions of the Video

Viewing the video

With the 'inviting' function, interdisciplinary treatments and consultations between medical institutions are possible.

While looking at your counterpart through Webcam, video conversations are available.

The passing time after beginning the video consultation can be checked.

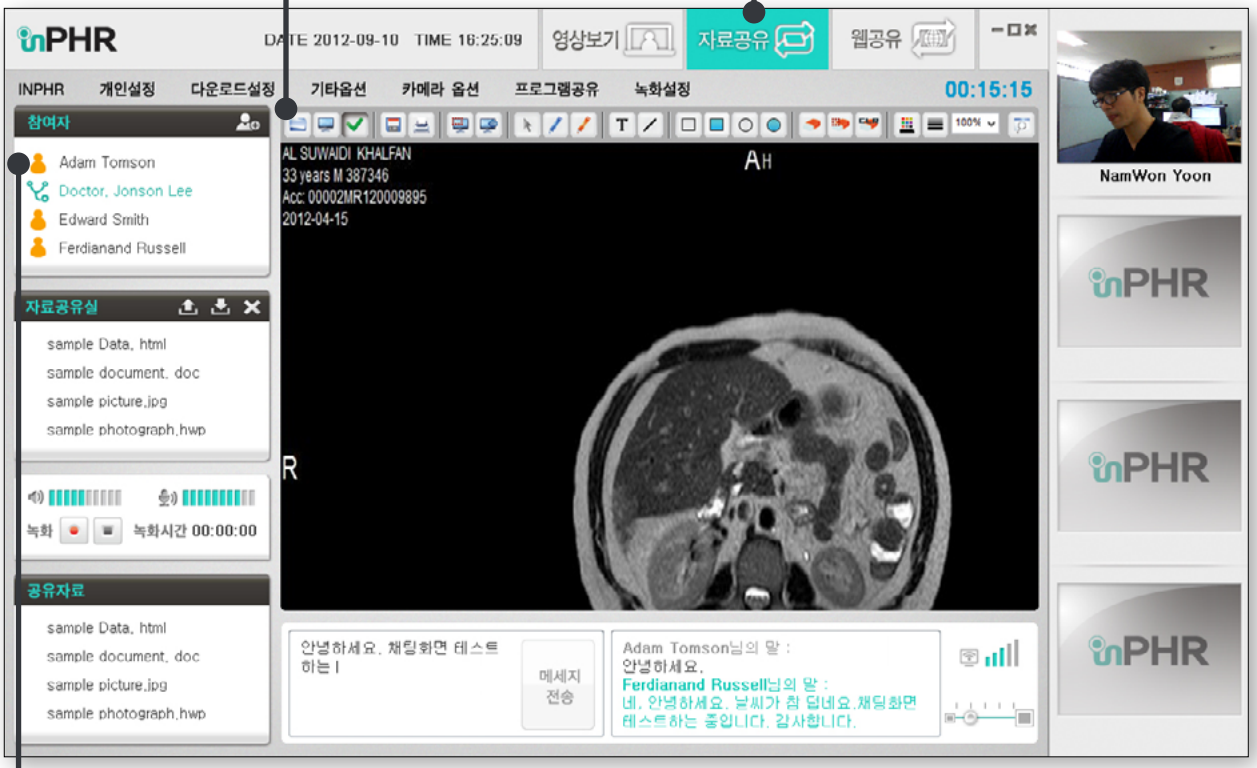
Consultation records can be saved with the recording function.

Conversation is also possible through chatting.

Data sharing

The picture board function provided to aid explanation helps your understanding during the consultation session.

Consultation is possible by sharing data such as pictures and documents on screen.



It shows the participants in the video consultation.

Web sharing

Web browser functions can be utilized, and the Internet screen can be shared.

Download and upload of data to the data-sharing room are allowed.

Displaying network status

Change of screen resolution

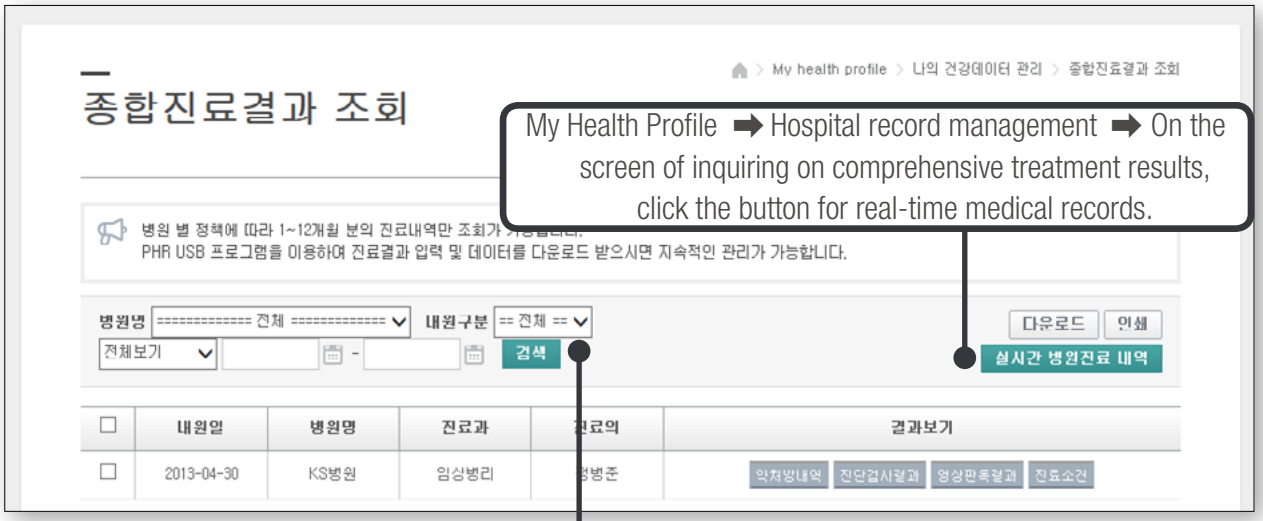
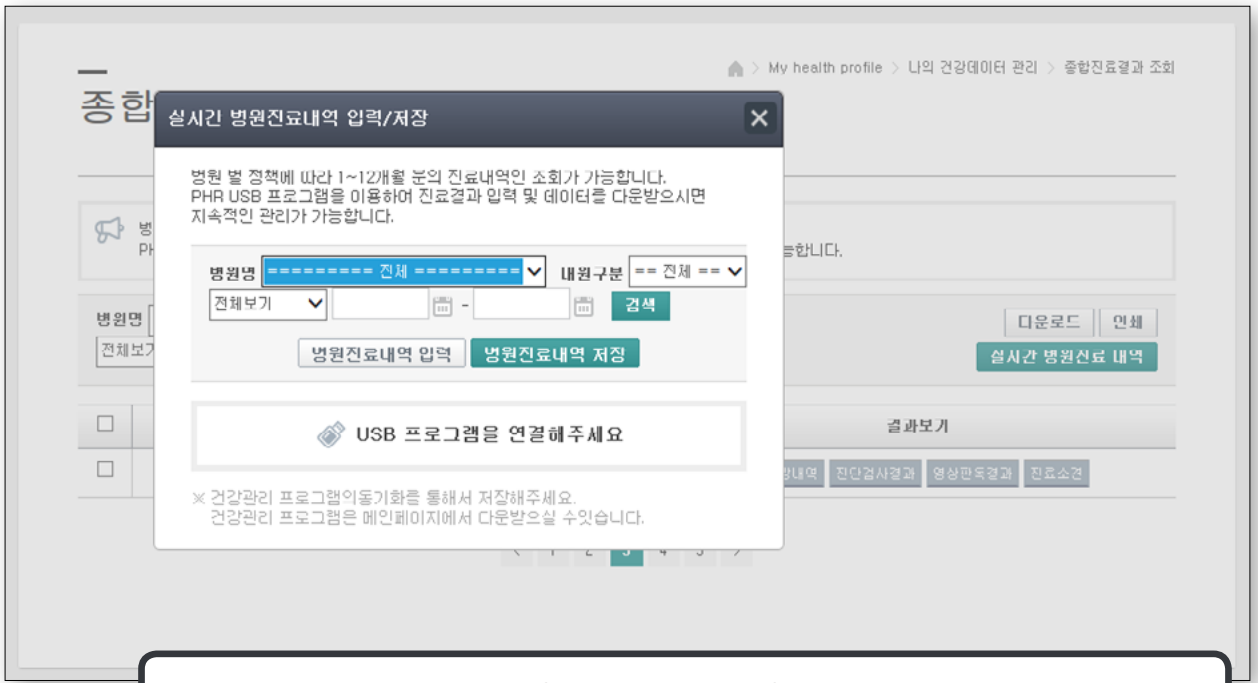
B. Real-time view of medical records



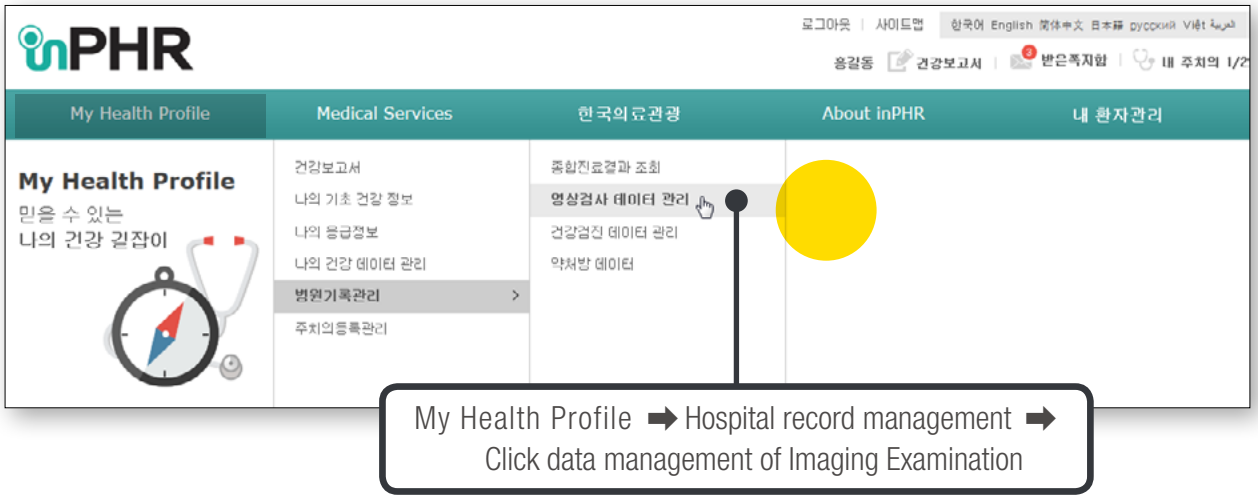
My Health Profile ➡ Hospital record management ➡ On the screen of inquiring on comprehensive treatment results, click the button for real-time medical records.

Search after setting the hospital and period of your choice. The registration card number should be registered to check real-time medical records. The registration card number can be continuously used once it is registered.



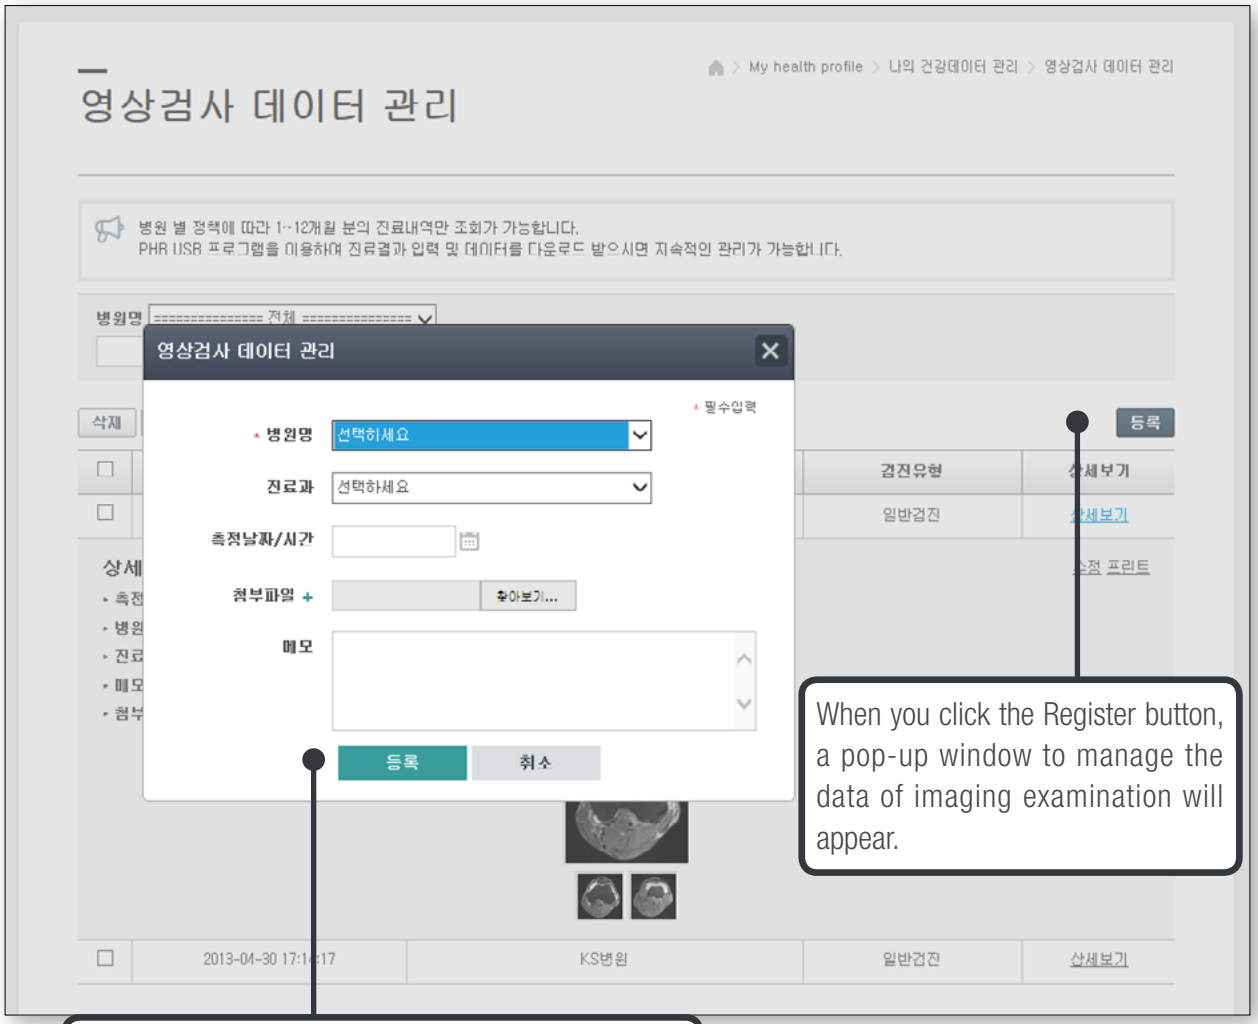
In order to store the contents after search, save after inquiring them at inPHR window software, and then store again through the synchronization process with the web. It is for strict protection of information in the process of individual's medical data.

C. Input and view of imaging test results



My Health Profile ➡ Hospital record management ➡ Click data management of Imaging Examination

Images of X-ray and MRI received from the hospital can be registered and managed.



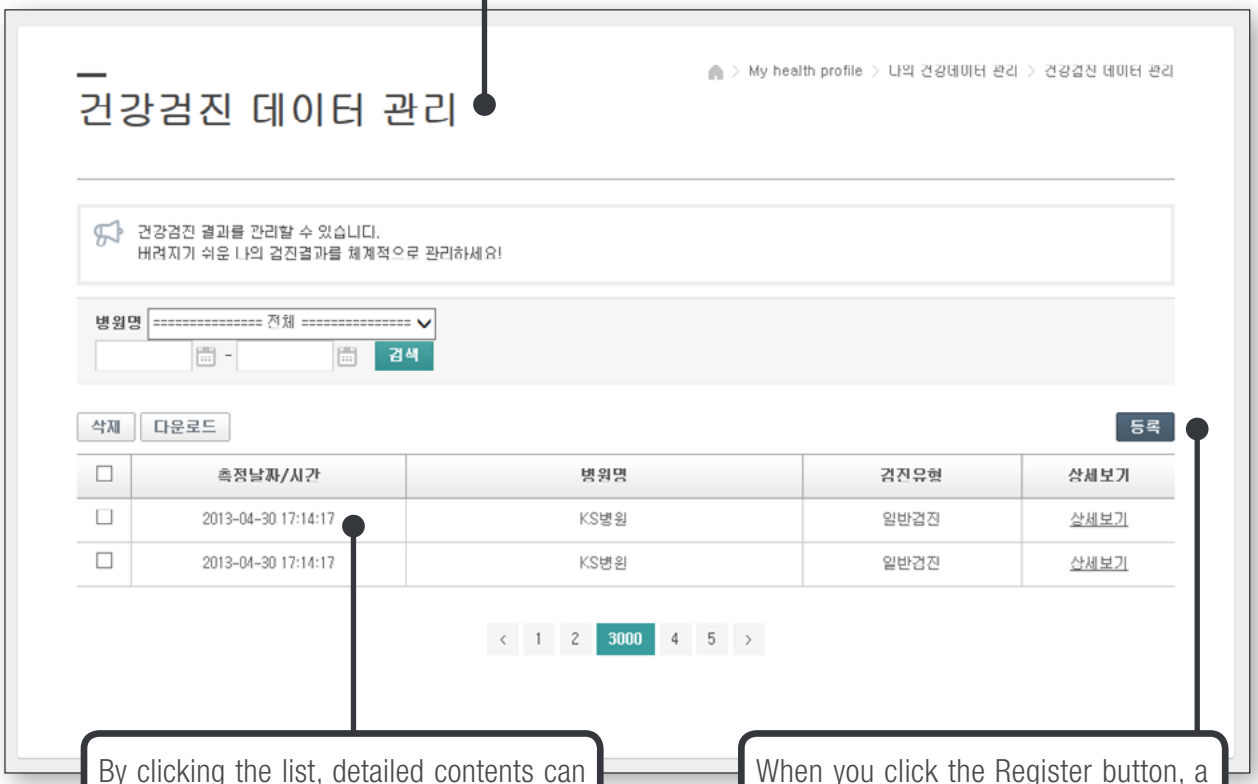
When you click the Register button, a pop-up window to manage the data of imaging examination will appear.

After inputting information including the hospital name, care department, date/time, attached files, and then clicking the Register button, it is reflected on the management list of imaging examination data.

D. Input and View of health screening results

My Health Profile ➡ Hospital record management ➡ Click Health screening

Health screening data received from the hospital can be inputted and managed.



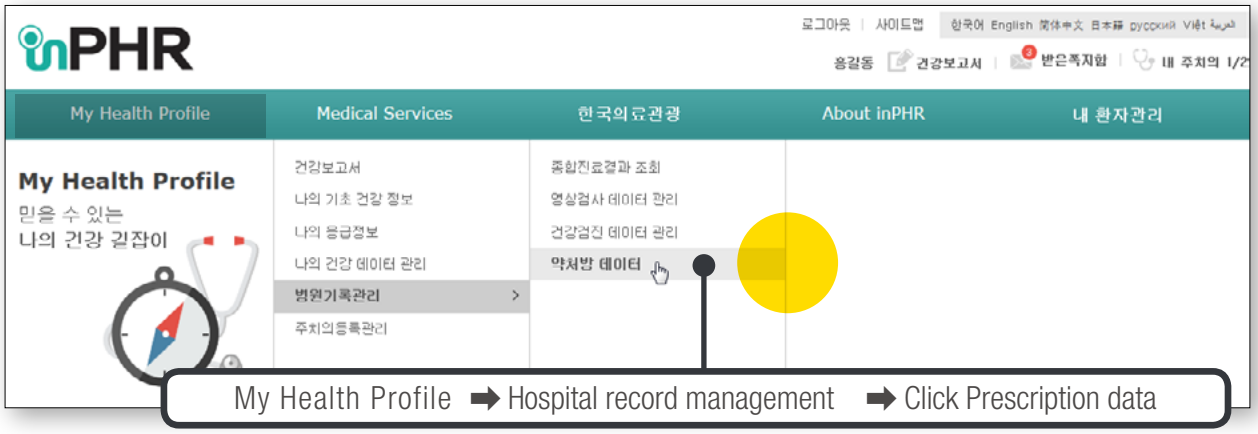
By clicking the list, detailed contents can be checked.

When you click the Register button, a window to write in detail will pop up.

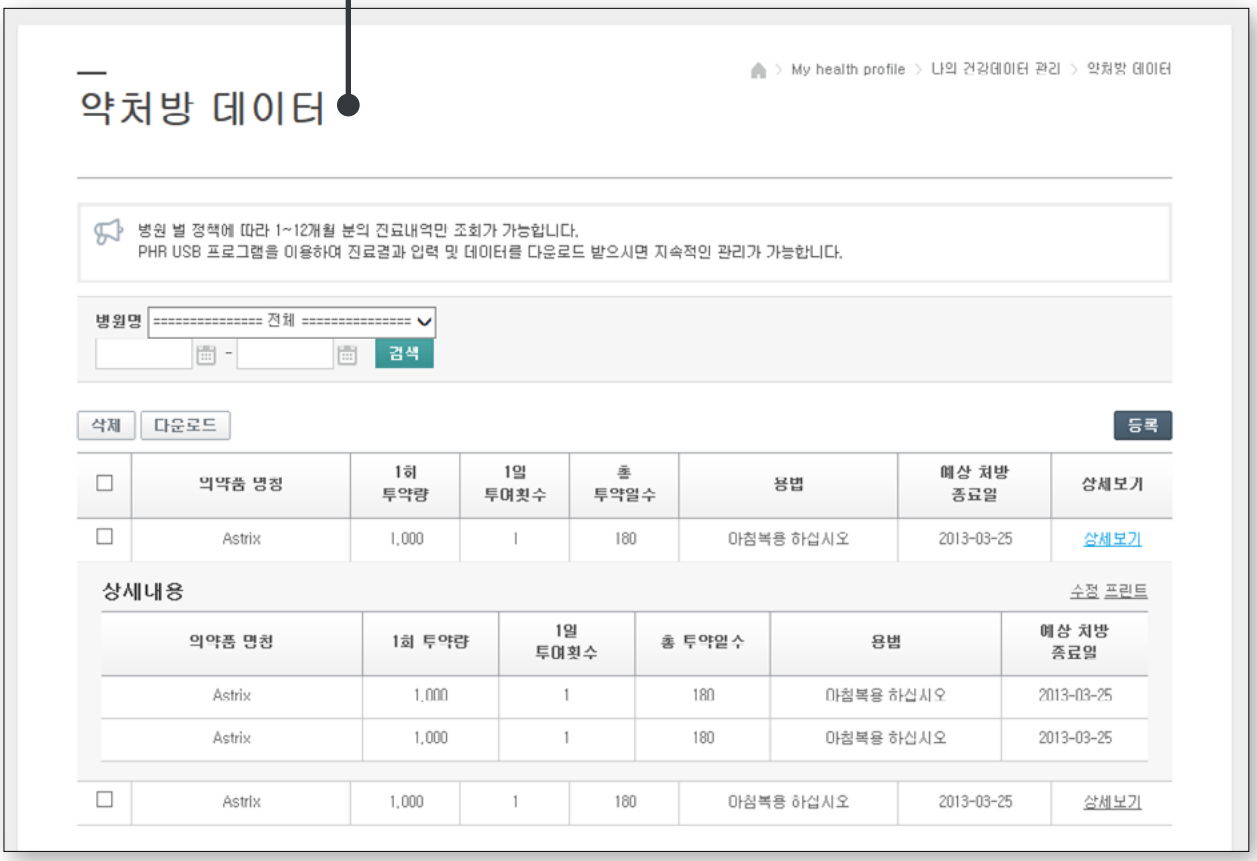
Inquiries on detailed contents of health screening data

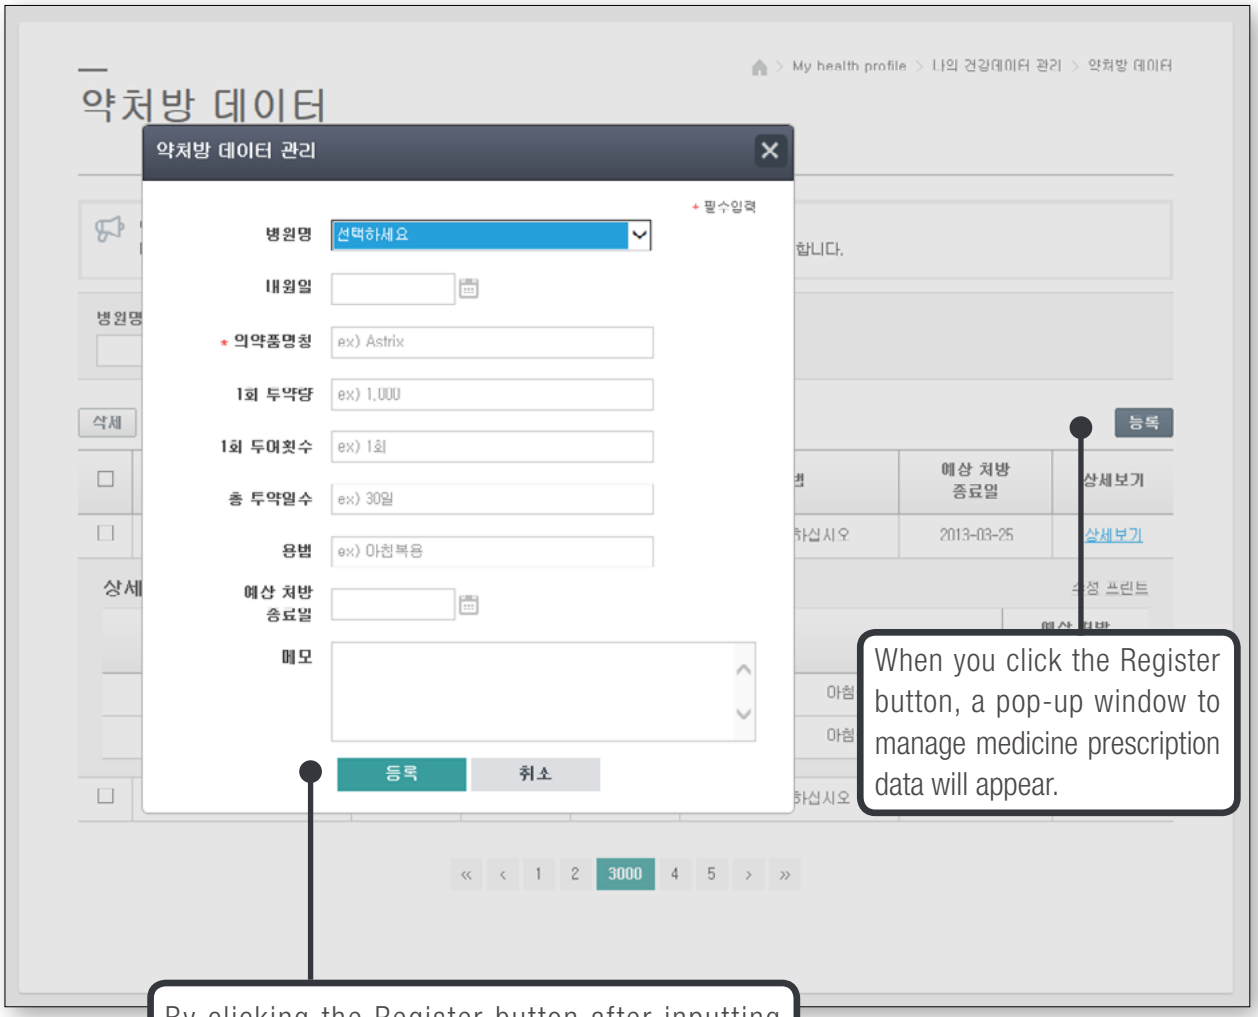
Registration of health screening data

E. View of prescription results



All currently stored details of prescriptions can be inquired. Prescription details are stored through the synchronization process with the Web after inputting them at inPHR Window software or using the mobile App.





When you click the Register button, a pop-up window to manage medicine prescription data will appear.

By clicking the Register button after inputting information such as the hospital name, visit date, pharmaceutical name, dosage of one time, daily medication frequency, etc., they are reflected on the list of medicine prescription data.

A. Modify Personal Information

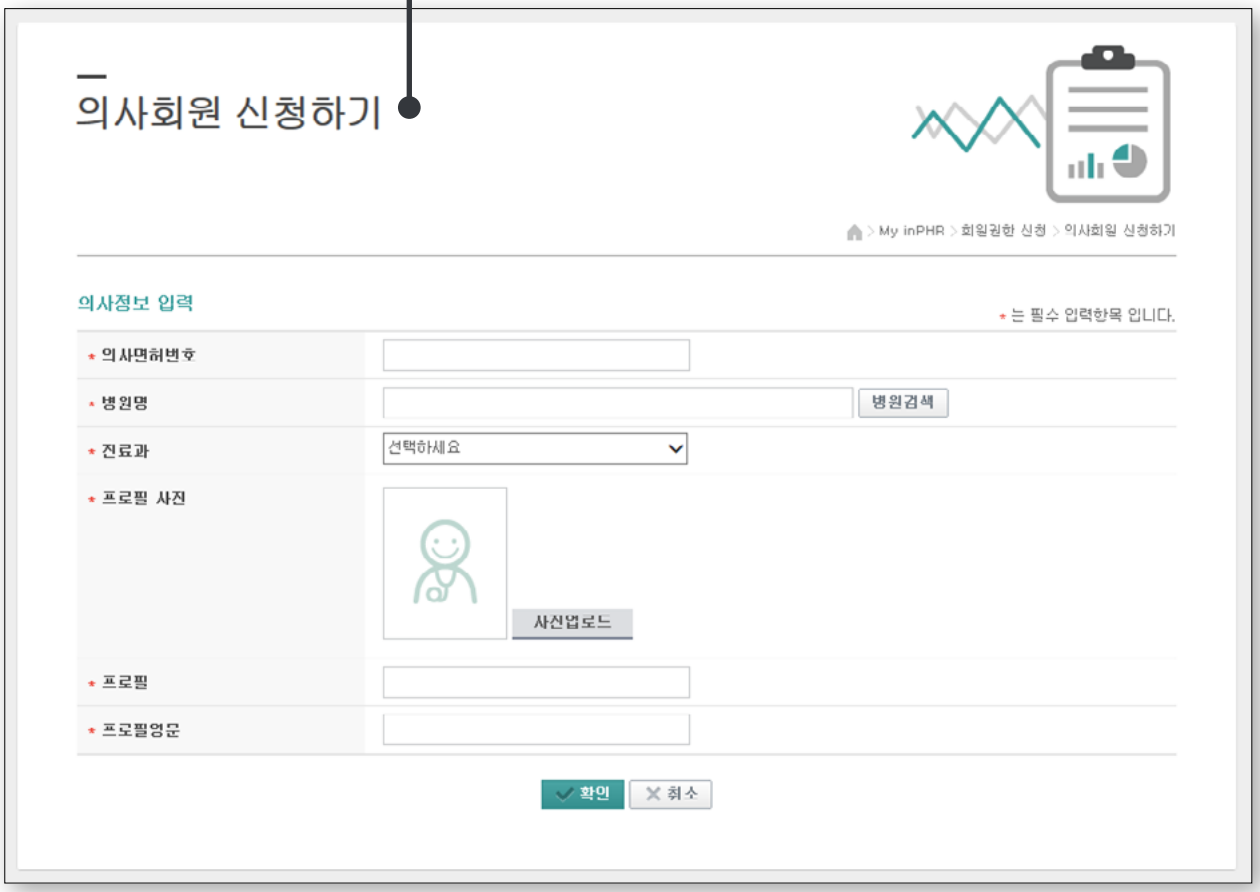
My inPHR ➡ Personal information ➡ Click Modify Personal information

B. Request of member authorization (doctor, coordinator, agency)

▶ Doctor member applications

My inPHR ➡ Membership authorization applications ➡ Click Doctor Member Application

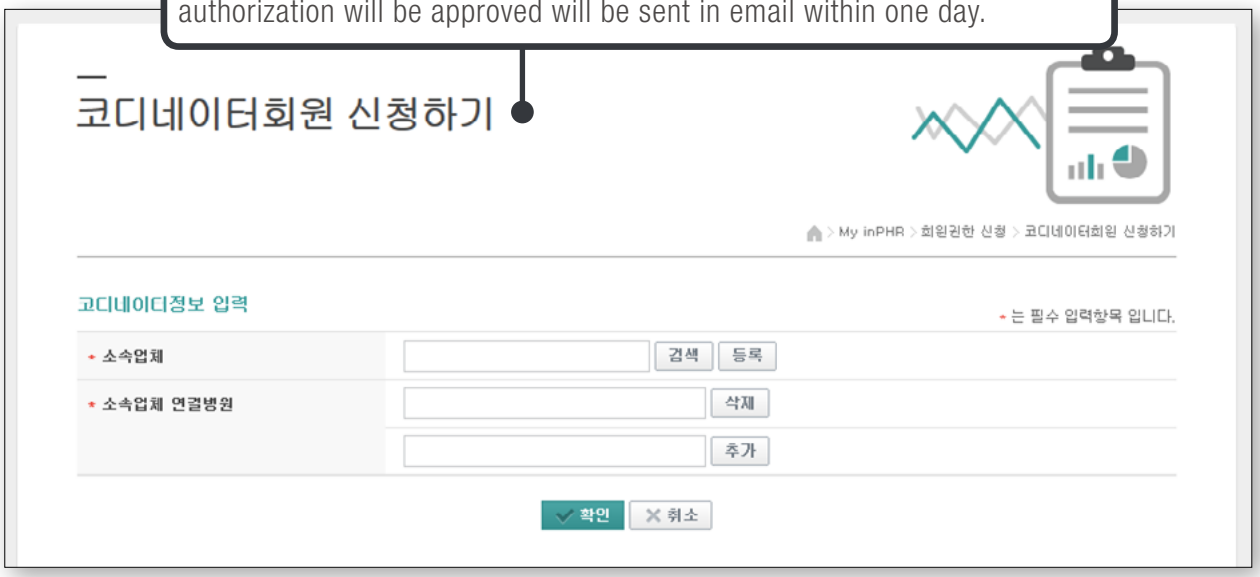
After inputting the license number, hospital name, care department, profile picture, profile, etc., click the Confirm button. At this time, you can send an email to help@inphr.com if the hospital name is not searched. Whether your authorization will be approved will be sent by email within one day



▶ Coordinator member applications

My inPHR ➡ Membership authorization application ➡ Click Coordinator Member Application.

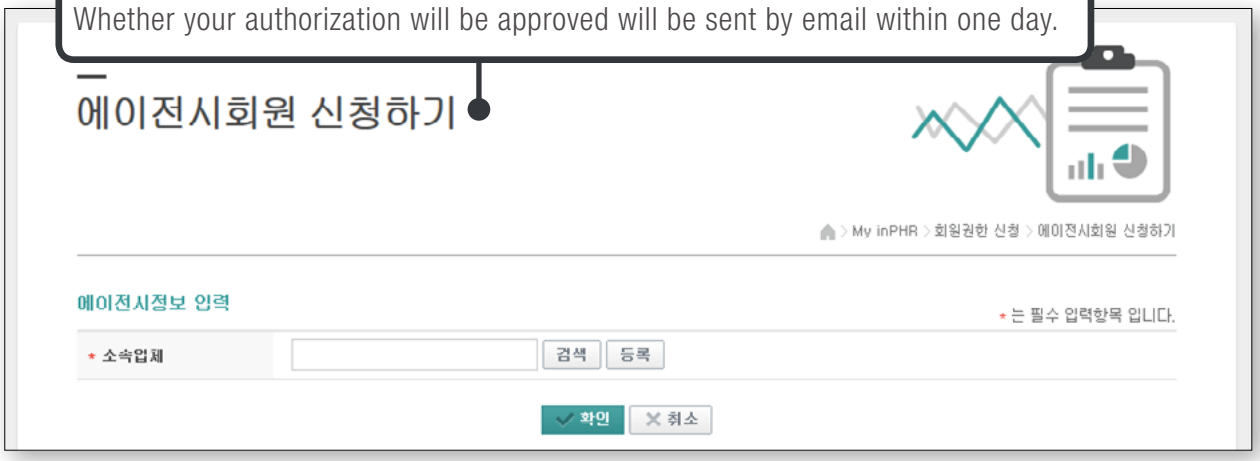
After inputting the company name and the medical institution affiliated with the coordinator enterprise, click the Confirm button. Generally, the enterprise name and the affiliated hospital are same. Whether your authorization will be approved will be sent in email within one day.



▶ Agency member applications

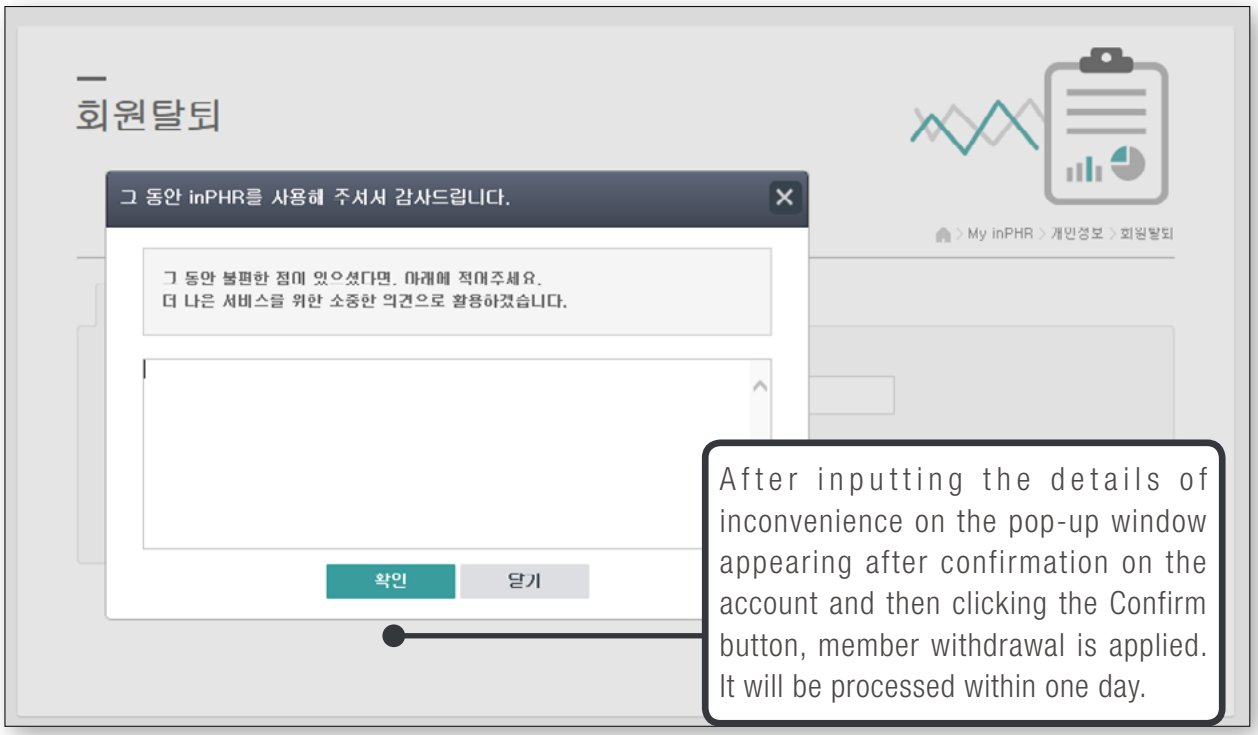
My inPHR ➡ Membership authorization applications ➡ Click Agency Member Application.

If the agency's enterprise name is not searched, it is applied after registering the name and then selecting the registered enterprise name by search.
Whether your authorization will be approved will be sent by email within one day.



C. Membership withdrawal

My inPHR ➡ Personal information ➡ Click Membership withdrawal



회원탈퇴

주치의 선정
My health profile > 주치의 등록관리 > 주치의 선정
As your private doctor can inquire the health records and medical records disclosed by the patient, you should carefully select the degree of disclosure of your information when designating the private doctor.
주치의 등록 및 정보 공개
정확한 진료를 위하여 건강정보, 개인정보 공개가 기본으로 설정되어 있습니다.
상기 주치의에게 공개하기를 원하지 않는 진료내역은 반드시 체크를 없애 주십시요.
진료내역의 공유기간은 병원에서 해당 정보를 공개하는 기간에 따라 병원마다 3~12개월 범위 내에서 상이할 수 있습니다.
이름
의사검색
